

**HAZARDOUS WASTE MANAGEMENT PROGRAM  
MANAGEMENT MEMO RESCISSION DOCUMENT**

**MANAGEMENT MEMO: #EO-94-003-MM**

**TITLE:           Guidance for Delayed Closure of Hazardous Waste Management  
Units at Permitted and Interim Status Hazardous Waste Facilities**

**AFFECTED PROGRAMS:**           Permitting Division  
  Statewide Compliance Division

**STATEMENT OF RESCISSION:**

Management Memo #EO-94-003-MM is hereby rescinded for the following reason(s):

The Department of Toxic Substances Control (DTSC) has replaced Management Memo #EO-94-003-MM with Permit Advisory PA 01-01 *ADelayed Closure of Hazardous Waste Management Units at Permitted and Interim Status Hazardous Waste Facilities that Convert to Generator Accumulation.* Permit Advisory PA 01-01 clarifies that:

1) delayed closure is limited to hazardous waste facilities that convert to generator accumulation-only status but cannot implement closure without shutting down the facility or seriously disrupting the facility's operations; and 2) a facility that has delayed closure remains subject to the provisions of Title 22, CCR Division 4.5, Chapter 14 (permitted facilities) or Chapter 15 (interim status facilities) until the facility completes closure in accordance with Title 22, CCR Division 4.5, Chapter 14 or Chapter 15, and DTSC approves the closure certification. In addition, DTSC may require, prior to a decision regarding delayed closure, that the facility provide DTSC results of environmental sampling in the vicinity of the proposed delayed closure unit(s) to evaluate whether there is any hazardous waste contamination. Procedures for implementation of delayed closure are discussed in further detail in Permit Advisory PA 01-01.
